Professional Summary

Python Developer with a foundation in Python programming, object-oriented programming, SQL, database operations, and software development fundamentals. Hands-on experience developing Python modules, building reusable scripts, processing structured data, debugging software issues, and working with Git in development environments. Familiar with data processing, file handling, exception handling, and relational databases, with additional exposure to AI fundamentals and data analysis. Seeking an entry-level Python Developer role to contribute to backend development, automation, API integration, and reliable software delivery.

Technical Skills

Programming Languages: Python, SQL

Python Development: OOP, Data Structures, Exception Handling, File Handling, Modules and Packages

Backend Development: REST APIs, FastAPI, JSON, HTTP Methods

Databases: MySQL, SQL Queries, CRUD Operations, Joins

AI/ML: Pandas, NumPy, Scikit-learn, Generative AI, API Integration

Tools: Git, GitHub, VS Code, Jupyter Notebook, Power BI, Power Query, Microsoft Excel

Professional Experience

Software Developer Intern — Gateway Software Solutions **Mar 2025 – Jun 2025**
Coimbatore, India *Python, Git*

- Developed and maintained Python modules to support application functionality and improve code maintainability.
- Investigated software defects, debugged code, and implemented fixes to improve application reliability.
- Participated in code reviews and testing activities while collaborating with the development team.

Data Science Intern — PySpiders **Mar 2026 – Jul 2026**
Bengaluru, India *Python, SQL, Pandas, NumPy*

- Developed Python scripts and data-processing workflows to collect, clean, transform, and organize structured datasets.
- Used SQL and Python to process data, validate records, and handle data-processing requirements.
- Created reusable scripts for recurring data preparation and preprocessing tasks, reducing repetitive manual work.
- Applied Pandas and NumPy to analyze datasets and identify data inconsistencies and processing issues.

Data Scientist Intern (Data Analytics) — VCodez **Jul 2025 – Nov 2025**
Chennai, India *Python, SQL, MySQL, Excel, Power BI*

- Used Python and SQL to analyze more than 30,000 business records and identify data inconsistencies and operational trends.
- Performed data cleaning, transformation, validation, and reconciliation to improve the accuracy of processed data.
- Applied SQL queries and MySQL database operations to retrieve and organize structured business data.
- Automated recurring reporting and data-preparation tasks using Python, SQL, and Power Query, contributing to a 40% reduction in manual reporting effort.

Key Projects

Task Management and Automation System *Python, FastAPI, MySQL, SQLAlchemy, Git*

- Developed a Python-based REST API to manage tasks using CRUD operations, JSON requests and responses, and HTTP methods for efficient data management.
- Integrated MySQL for database operations and implemented input validation, exception handling, and error responses to improve application reliability.
- Organized application logic into reusable Python modules and tested API endpoints using Postman to verify request handling and database operations.

AgriPredict: Weather-Aware Crop Market Trend Analysis *Python, Pandas, NumPy, Scikit-learn*

- Processed and analyzed agricultural and weather datasets using Pandas and NumPy to identify patterns and relationships between weather conditions and crop market trends.

- Applied machine learning techniques to analyze historical data and develop predictive insights for crop market trends based on available dataset features.
- Prepared data-processing workflows and presented analytical results through an interactive application to support data-driven agricultural decision-making.

AI Health Chatbot *Python, Streamlit, Generative AI, REST API, JSON*

- Developed an AI-powered healthcare chatbot that accepts user queries and generates contextual responses using a generative AI model.
- Integrated API-based model communication using JSON requests and responses to process user inputs and display generated answers through an interactive interface.
- Built a Streamlit interface for interactive conversations and structured the application workflow to handle user inputs and AI-generated responses.

Education

B.E. in Computer Science and Engineering **2026**
Hindusthan College of Engineering and Technology, Coimbatore CGPA: 8.05

Certifications

- Data Science Course — PySpiders, BTM, Bengaluru
- Artificial Intelligence Fundamentals — IBM SkillBuild
- Python for Data Science — GUVI
- Power BI Real-Time Dashboard Workshop — Office Master
